

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (original) A method of generating a caricatured image, comprising the steps of: determining a caricature level value in dependence on an intended size of the caricatured image to be generated; and generating the caricatured image using the caricature level value thus determined.
2. (original) A method according to claim 1, wherein the determining step further comprises determining the caricature level value as a generally inverse function of the intended size of the caricatured image to be generated.
3. (original) A method according to claim 2, wherein the function is applied over at least a sub-range of the possible range of intended sizes of the caricatured image to be generated.
4. (currently amended) A computer program or suite of computer programs arranged such that when executed by a computer system it/they enable the computer system to operate according to ~~any of the preceding claims~~ claim 1.
5. (original) A computer readable storage medium storing the computer program or one or more of the suite of computer programs according to claim 4.
6. (original) A system for generating caricatured images, the system comprising processing means arranged in use to:
 - i) determine a caricature level value in dependence on an intended size of the caricatured image to be generated; and
 - ii) generate the caricatured image using the caricature level value thus determined.

7. (original) A system according to claim 6, wherein the processing means is further arranged in use to determine the caricature level value as a generally inverse function of the intended size of the caricatured image to be generated.

8. (original) A system according to claim 7, wherein the function is applied over at least a sub-range of the possible range of intended sizes of the caricatured image to be generated.
